

February 21, 2023

Attn: Jeffrey Benya (EGLE)

In response to the Michigan Department of Environment, Great Lakes, and Energy reaching out to us about 45550 Van Dyke Ave, Utica, Ni 48317 and the fact that we had not done an Asbestos inspection prior to demolition.

This is our first major renovation for our company and we hired a General Contractor that pulled the Demolition Permit. I was completely unaware of the NESHAP regulation and need for an inspection prior to demolition. Since we have read the requirements and are familiar with the NESHAP regulations. We apologize for not being aware of this in advance. We felt our General Contractor would care for any inspection needed, but we also realize we should have been aware. I can assure you that in the future of we ever do another renovation like this we will be sure to have inspections prior to starting demolition.

I hope you find this response reasonable and see that we did not try to avoid any inspections and that it was purely from a lack on knowledge on the NESHAP.

If you have any further questions I am happy to answer anything you would need.

Thank you,

Brian H Barczyk
