Data includes both nonLSL sites with only a first liter sample and LSL sites with a first and fifth liter sample.

Code definitions for the data:

L1 = First Liter

L5 = Fifth Liter

A = Accepted and used in the 90th calculation

R = Rejected and not used in the 90th calculation

NH = Not Highest (meaning not the highest result from the site and therefore not used in 90th calculation)

MICHIGAN DEPARTMENT OF ENVIRONMENTAL QUALITY
DRINKING WATER AND MUNICIPAL ASSISTANCE DIVISION

SAMPLING PLAN – LEAD AND COPPER

Issued under authority of the Michigan Safe Drinking Water Act, 1976 PA 399, and Administrative Rules, as amended. Administrative Rule R 325.10710a requires a water supply to monitor for lead and copper according to a pool of targeted sampling sites in accordance with designated site selection criteria. Complete and submit this form to MDEQ.
